C Regulatory-module responses by PRECISE411 functional category
Amino Acid and Nucleotide Biosynthesis
NarL | Denitrification (Nitrate)
DhcR | Carnitine catabolism
Antibiotic Resistance
CzcR | Resistance-nodulation-cell division (RND) divalent metal cation
Biosynthetic Gene Cluster
PchR | Pyochelin synthesis
PvdS | Pyoverdine synthesis
NRPS | Nonribosomal peptide synthetase
QscR-2 | Phenazine/Pyocyanin biosynthesis
k-opioid | Nonribosomal peptide synthetase (Pyoveridine)
Carbon Source Utilization
HexR-1 | Glucose metabolism
Metal Homeostasis
Iron acquisition | Iron acquisition
Anr-1 | Molybdenum cofactor biosynthesis
FpvR | Ferripyoveridine system
LasR | Pyochelin biosynthesis and Secretion (I) system
FoxR | Iron chelator
Quorum Sensing
Quorum sensing | Quorum sensing
Secretion System
TagR1 | H1-Type VI secretion system
Stress Response
RpoS-2 | General stress response
Translational
Translational-1

TOB 0.4 µg/mL
Relative to induced control1. Filled circle: q < 0.05 and |delta A| > 5; open circle: q < 0.05 with smaller effect. Cross: projection coverage flagged.
Native atlas activity scale; module direction follows reference gene weights. No KD + TOB transcriptomes.
